Sooner or later every woman must duel with Death. Nature has provided her with

the condition of which the health of her

gans fully closest to her -the time

distinctly

Favorite Prescription is designed for the purpose of curing all diseases, or disorders of the feminine system, except cancer It stops debilitating drains, soothes inflammation, promotes regularity of the monthly function and puts the whole female organism into a state of strong, vig-

Taken during the period of gestation it tobs childbirth of its pain and danger. Over 250,000 grateful women have written of the wonderful help of the "Favorite Prescription." Among others Mrs. Cordelia Henson, of Coalton, Boyd Co., Ky., writes: "In October 1880 I gave birth to a baby and the treatment I received at the hands of the midwife left me with prolapsus. I had no health to speak of for three years. I had another baby sich was the third child. My health began to fail and I then had three miscarriages and found myself completely worn out. I had so many ins and aches my life was a burden to me and also to all the family, for I was nervous and cross and I co. id not sleep. Had four doctors, They said I had liver, lung and uterine trouble. I was in bed for months and when I did get up. I was a sight to behold. I looked like a corpse walking about. I commenced taking Dr. Pierce's Favorite Prescription and in a few weeks I became a well woman. Before

fered all a woman could suffer at my monthly

in every way. My cheeks are red and my face is

ods, but now I have no pain. The dark circles around my eyes are gone and I feel better

ite; before my face was as yellow as saffron."

FILIPINOS AND RELIGION.

Those in Buffalo Bill's Show Have Had Enough of It.

Some fashionable women with no end of leisure and a charity as broad as the world, took it into their heads to convert the Filipinos. There are three of them with Buffalo Bill's Wild West this year and they were accorded much attention, complimentary and otherwise, during their recent stay in the parlors of the woman's department in New York. The wealthy dames who fancied foreign missionary work at home called upon Colonel Cody and begged the privilege of teaching the poor people the great truths of Christianity. The permission was given with a smile. The women attacked the work with enthusiasm. It promised so much in the way of novelty

range rebellions and play havoc with the plans of civilization, but they appeared stolid in the matter of religion. Or perhaps the experience of their grandfathers with the church and their own frequent tastes of Spanish faith, had made them look with a slighting eye upon whatever smacked of priest and prayer. They wanted no religion. And their indifference even turned aside the good intentions and pleasure pursuits of some of the well-known New York women And since then, one race of the rough riders of the world has been left alone, undisturbed by tracts and things of like nature

A QUAKE OF THE EARTH

SHOCK DISTINCTLY FELT IN THIS CITY AT 8:05 LAST NIGHT.

ports from Other Indiana

Indianapolis experienced a genuine earthquake last evening, which began about 8:00 and lasted about six seconds. The vibration was most distinct, although but one was noticed. In the down-town office buildings the desks shook and the shock was of sufficient strength to be noticed by th time. An earthquake was not generally thought of and boilers and dynamos in buildings in the business part of the city were given credit for acting in some way out of the ordinary

In the residence part of the city it was generally noticed and it was strong enough to rattle windows and doors. Advices from other parts of the State show that it was much stronger than the shock felt here. But one vibration was noticed, and no one spoke of any sound accompanying it. The direction seemed to be from south to north, and it was felt in all parts of the city. It was not strong enough to do any damage here, but was noticed alike by those who were in high buildings and on the first floor. The man in the tower, who would be commonly supposed to seize the nearest stationary article in case of an earthquake, said that he noticed that something unusua was going on, but he did not think of an earthquake. When it was mentioned to him earmarks of an earthquake. The shock passed too quickly for any one to realize more than the mere fact that it was an earthquake, and the estimates of its dura-tion were as varied as the number who no-

The shock was distinctly felt by Dr. O. S. Runnels, who was on North Delaware street at the time, and he immediately recognized the sensation as that of an earth-Mrs. Kate Purcell, of 931 North Illinois

street, was entertaining some friends and

all were sitting around a table on which

a drop light was placed. The shock was strong enough to throw this drop to the loor and many of the neighbors left their houses. The shock seemed to be more se-vere in this vicinity than in any other. At the home of Mr. William Haueisen, on North Meridian street, the noise was disfinctly noticed and it was such that Mr Haueisen was of opinion that a chimney was about to fall. He was on the second floor of his house and a servant, who was on the third floor, ran from her room in a Prof. H. L. Bruner, of the chair of biology and geology of Butler College, noticed the shocks distinctly. He had retired to his bed, as he had been away and was very tired. He said he felt the shocks plainly and at once recognized them as earthquake shocks, as he experienced one in Germany As near as he could judge, it was a horizontally progressive earthquake in which the shocks spread over the surface of the ground like waves on water, to a great disgarded by geologists as the true kind of an earthquake. The velocity of shocks of this sometimes is as high as 140 miles a minute. Earthquakes of this kind are a trifle more frequent in winter than in summer. Convariation of earthquake intensity, the maximum of the curve is attained in January It is safe to say that not another station in and the minimum in July, but the difference the country has furnished as desirable body is slight. Professor Bruner said that the state of the air, the peculiar sultriness and poressiveness, is neid by some scientists to be an indication of such disturbances and to accompany them, but the fact has not been

scientifically established. EARTHQUAKE IN INDIANA. Tore Down Chimneys and Cracked Walls at Vincennes.

Special to the Indianapolis Journal. VINCENNES, Ind., April 29 .- To-night at s o'clock the worst earthquake shock ever known here was felt in this city. It was accompanied by a deep rumbling sound. Buildings rocked and trembled and the occupants rushed to the streets in fright. Windows and all loose articles rattled. No loss of life or property has yet been reported. A number of chimneys were torn down and brick walls were damaged. A large chimney of the Grand Hotel was knocked down and fell with a crash in the street, just missing a woman who was passing.

Shook for Four Seconds.

Special to the-Indianapolis Journal. NEW ALBANY, Ind., April 29 .- An earth quake was felt in this city at 8:05 o'clock to-night. The motion was east and west and was very perceptible. The vibration lasted about four seconds and was accompanied by a rumble as of distant thunder. It was of sufficient force to rattle windows and stop clocks and caused momentary alarm. No damage was done in this city. At Borden, eighteen miles north of this city, on the Monon, the shock was very distinct and caused light articles to topple

Nearly Caused a Panic.

Special to the Indianapolis Journal. SHELBURN, Ind., April 29 .- Almost a panic followed the earthquake here to-night The Curry Prairie Baptist young people's convention was in session and the church was shaken with a great force. Many people left the church. Every house in town
